## CLIP-UNCLIP SYSTEM HOW IT WORKS

With great pride, Medic Accès introduces an entirely new system of PPE organizers and supply dispensers for infection control and daily hospital care.

Our dynamic and ergonomic Clip-Unclip system is designed to further our focus on evolving each of our products and organizers in order to maintain close adaptation with your actual and future needs in meeting infection control requirements and regulation.

How does Clip-Unclip operates ?

The wall-mounted system is based on the fasten, unfasten approach where universal wall-mounted anchors CLIP-001 and CLIP-003 are fixed at appropriate locations of your choosing in a patient room or a hospital corridor.

Fastened upon these CLIP-001 and CLIP-003 anchors, a variety of PPE organizers and dispensers can be moved around locations where infection control or daily care attention require supplies for the acting personnel.

With wide versatility, Clip-Unclip dispensers are easily gathered to provide adequate tools wherever acute infection control is required.

A dynamic corridor is maintained, regardless of the prevalent infectious conditions in the establishment.

For more information and advice, please contact one of our technical representatives for assistance in designing your dream corridor.

Yours truly,

Denis Sirois  
President

Frederic Legault  
Vice-President

## CLIP-UNCLIP SYSTEM HOW IT WORKS

Although isolation alerts are not everyday occurrences, day-to-day hospital patient care requires efficient management of PPE dispensing and availability.

With this in mind, a wide choice of Clip-Unclip dispensers may be designed to address the two categories of situations.

For instance, day-to-day care will require dispensers containing largely disposable supplies such as gloves, alcoholic gels and solutions, wipes, guard basin bags, urine bags, blue disposable underpads, diapers, etc.

In case of an outbreak that necessitates isolation, the appropriate PPE dispenser can be easily moved to the next closest Clip. Clip-Unclip dispensers and organizers other than the ones dedicated to day-to-day care or isolation can contain supplies such as standard masks, with or without shield, N95 masks, gowns, hair nets, shoe covers, etc.

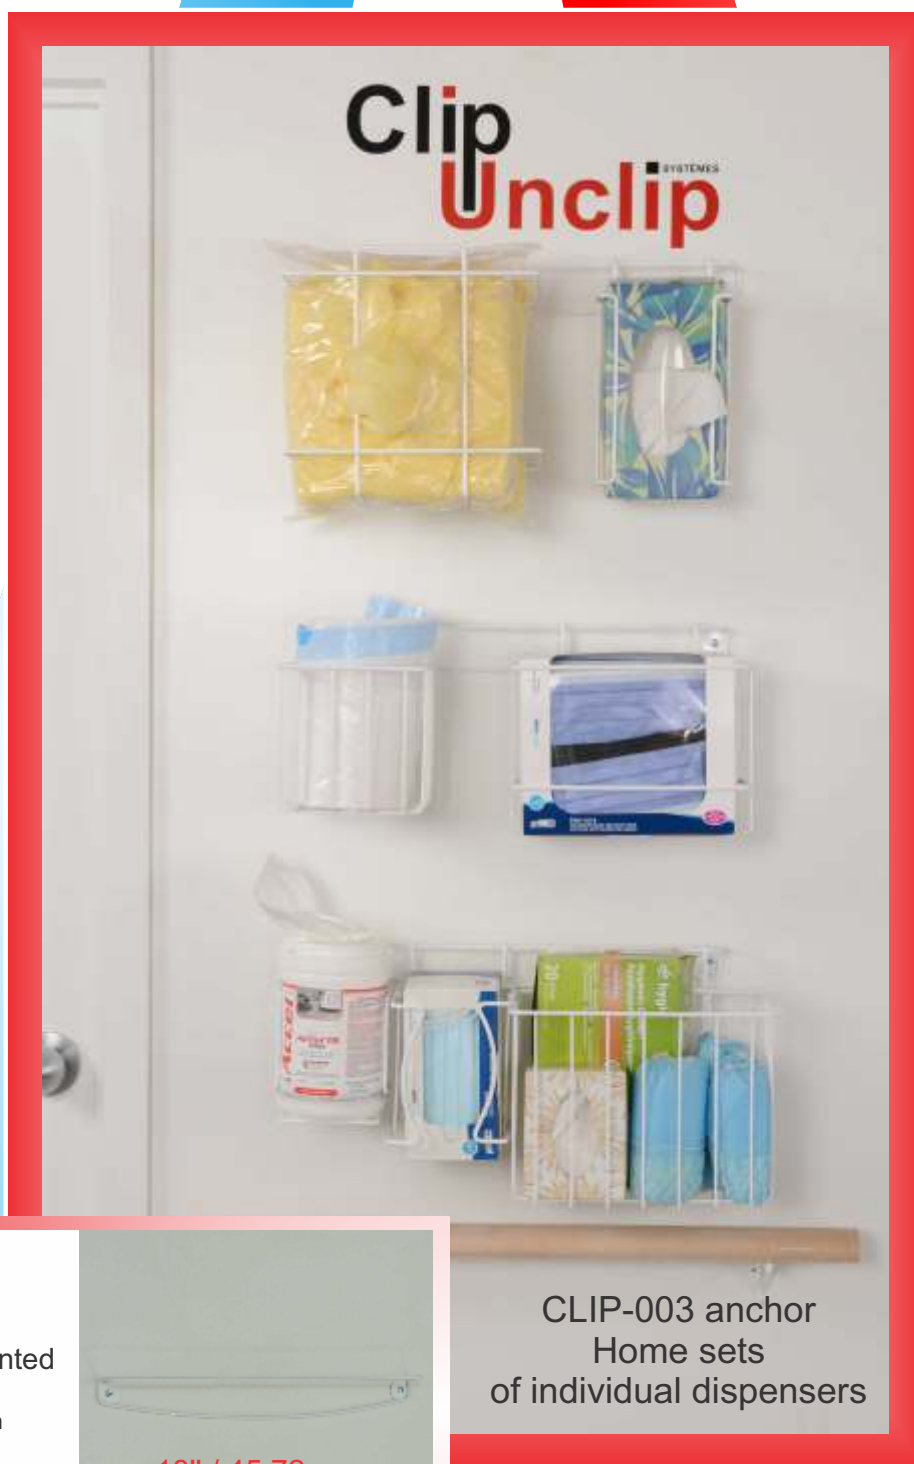

We invite you to further discuss these infection control routine issues with one of our representatives and explore how a Clip-Unclip system may assist you.

## CLIP-UNCLIP SYSTEM HOW IT WORKS

### THE BASE OF THE CLIP-UNCLIP SYSTEM (HOOK-UNHOOK)

#### Wall anchor CLIP-001 / CLIP-003

##### CLIP-001

Universal wall-mounted  
anchor

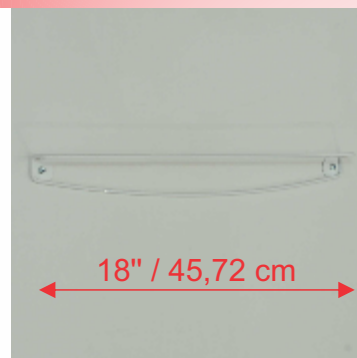

Height Width Depth  
2" x 12" x 1 1/2"  
5,08 x 30,48 x 2,54 cm

##### CLIP-003

Universal wall-mounted  
anchor

Height Width Depth  
2" x 18" x 1 1/2"  
5,08 x 45,72 x 2,54 cm

#### Properties of a single dispenser anchor

For large format dispenser  
a CLIP-001 anchor

Single dispenser  
on CLIP-001 anchor

#### Properties of a combined dispensers anchor

Depending on the format, up to three (3)  
individual dispensers on a CLIP-003 anchor.  
For example: by combining together a  
single wipe dispenser CLIP-V01A,  
mask CLIP-M01 and a basket CLIP-PP05

Combined dispensers  
on CLIP-003 anchor

All steel surfaces coated with electrostatic application of thermoplastic powder.  
High temperature thermal baking Glass-like,  
glossy white finish resistant to corrosion and impacts.
