## WHY WILL OUR ISO SYSTEMS ALWAYS REMAIN UP TO DATE?

A reliable design for anchoring PPE dispensers to the perforated surface of the ISO system

Our ISO systems feature stainless steel anchors

Aluminum plate

Configured in accordance with your present needs and able to respond to tomorrow's challenges

Any existing medical supplies can be adapted to fit our dispenser systems

No adhesives, no tools !

# ISO Mobile System

## AVAILABILITY

Immediate and convenient access to PPE dispensers prior to entering high risk zones greatly facilitates enforcement of infection control procedures.

Our ISO organizer do just that

## MOBILITY

The system is a vertical dispenser carts for medical personal protective equipment (PPE)  
Mobile, vertical and modular

## VERSATILITY

Accomodate every and all brands of PPE on the market

## PERSONALIZED

Entirely personalized by you, according to your specific requirements with final assembly at our plant

### ISO SPECIFICATIONS

Overall height : 76" / 193,04 cm

Main surface ISO : Aluminum, 0.100", 18 X 50" / 45,72 X 127 cm

Base footing plate : Carbon steel, 1", 16 X 16" / 40,64 X 40,64 cm

Wheels :

Front lockable (2), dia. 2 3/4", 6,98 cm.

Back (2), dia. 2 3/4", 6,98 cm w/o lock.

Finish : Pure glossy white, thermal baking of electrostatic powder

Custom Made Mobile ISO System

# ER

Where rooms are curtained off and there are no solid walls:  
clean and dirty meet in the corridors.

## The solution! ISODU-001

Spacing between the plates 3".

Curtains insertion between  
the two plates.

Clean side corridor (wall consisting of curtains)

Dirty side bedroom (wall consisting of curtains)

ISO-DU001 System

To isolate droplets and splashes, the dirty side plate is without perforation,  
wider and taller than the clean side plate .

Isolation station for a mental health environment.

**ISO-G**

No detachable dispenser.

**ISO-G System**

The **ISO-G** is composed of the following dispensers.

**G03V** Gloves (3 boxes) with vertical grip

**SG20** Single use gowns 2 X 10

**M01** Standard masks

**M05** Masks with visor

**V01A** Wipes

**PP05** X 3 Multipurpose baskets

**MICRO01** Microsan (DEB) 500ml

**DR04** Collection basket

## WALL-MOUNTED SWIVEL ORGANIZER

ISO-18

WITH EASY ANCHORING,  
ISO SYSTEMS WILL ALWAYS  
REMAIN UP TO DATE

# ISO Wall-mounted Systems

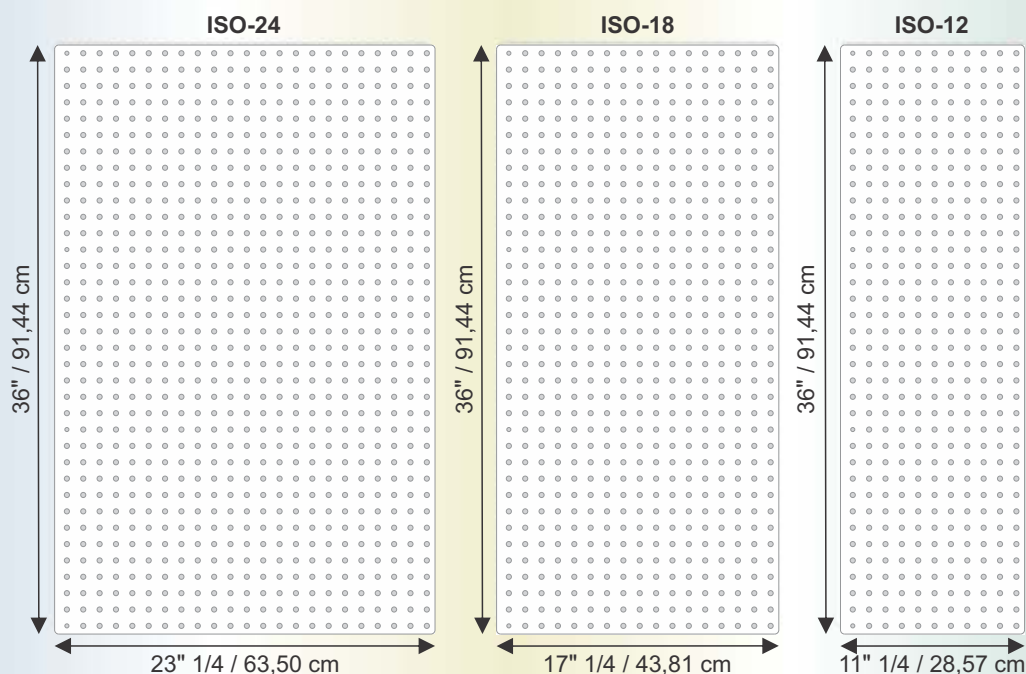

One wall-mounted unit can covert PPE requirements for up to 4 patient rooms, depending on the distance separating the rooms.

Each modular system may be fully personalized to reflect your specific needs prior to final assembly at our plant.

The wall-mounted organizer consists mainly in a vertically oriented surface designed for dispensing personal protective equipment (PPE) medical supplies.

Installation of all modules does not require any tools because stainless steel screws and wing nuts are provided.

Medical care personnel or any other user will have immediate access to specialized and state of the art protective supplies according to the conditions prevailing in their environment.

**The wall-mounted systems are 36 inch high / 91,44 cm but are manufactured in 3 different width formats**

**Available width formats : 11 1/4", 17 1/4" & 23 1/4" / 63,50, 43,81 & 28,57 cm**

**SWIVEL**

**The swivel organizer is designed to facilitate cleaning and disinfection procedures by maintenance personnel**

## ISO-12-18-24

**ISO System**

**Clip  
Unclip**<sup>TM</sup>

Besides being adapted Clip-Unclip, this ISO plate is configured according to a specific request.

# Contamination of the environment when changing adult briefs.

**Direct contamination of furniture  
and bedding**

**Contamination of bedding**

**Contamination of bed rails**

**Contamination of furniture**

**Contamination of door handles**

**Sorting of soiled materials and  
contamination of the area  
outside the room**

***Reduce environmental contamination,  
improve hand hygiene and save  
time with a single tool***

Using the hygiene care dedicated cart (C-DASH)

Original idea and execution:  
Layal Abou-Chacra, RN, MSc  
Clinical nurse Specialist – ICP  
Design and manufacture: Médic Accès

## ***Presentation of the C-DASH cart***

Alcohol solution

Disinfecting wipes

Trash bag

Resident/Patient  
clothing bag

Bedding and  
towel bag

## How to eliminate environmental contamination during hygiene care using a C-DASH cart.

1

At the start of each work shift:  
Take a disinfecting wipe.  
Close the container.  
Disinfect the entire cart.

2

Install clean new bags.

3

Prepare the materials  
for providing a bedbath  
or perineal care  
and draw the cart up  
near the patient/resident.

4

Disinfect your hands using  
the alcohol-based solution  
attached to the cart.

Put gloves on just before  
carrying out hygiene care.

5

Remove the soiled briefs.  
Immediately dispose of them  
in the cart trash bag and  
clean the patient/resident.

6

Dispose of the soiled briefs,  
facecloths and linen  
in the respective  
bags on the cart.

7

After completing the  
hygiene care, dispose  
of everything that is soiled.  
Immediately discard your  
gloves in the cart trash bag.

8

Disinfect your hands using  
the alcohol-based solution  
on the cart.

9

When your hands are clean,  
put the clean briefs on the  
patient/resident and dress  
the person again.

10

After contact with the resident  
and the person's environment,  
disinfect your hands using  
the alcohol-based solution  
on the cart.

11

Remove the waste bags as  
soon as they are half-full.  
Disinfect your hands.

12

At the end of each work shift:  
Take a disinfecting wipe from  
the container.  
Close the container.  
Disinfect the entire cart.  
Take off your gloves and  
disinfect your hands.

**Using this method with the C-DASH Hygiene Care Dedicated Cart,  
contamination of the environment is greatly reduced.**

## MINIMAL SURFACE EXPOSURE

The robust wire mesh we use to manufacture our holders/dispensers offers many advantages to infection control personnel.

With a minimal surface area exposed to airborne components, the accumulation of foreign contaminants is negligible.

The wire mesh is quickly cleaned and resists disinfectants and harsh chemicals.

The mesh is dipped and coated with electrostatic treatment of a thermoplastic powder which is oven-baked at high temperature to leave a glossy finish as a durable protection against impact and corrosion for decades to come.

The wire mesh holders are designed for the PPE supplies required for the infection control sector and may be attached to most surfaces and to our ISO and CLIP-UNCLIP stations.

Holders/dispensers available for every commercial medical PPE carton format on the market.

**MASKS AND HANDKERCHIEFS DISPENSERS**

All our dispensers can be custom made according to the specifications of your supplies.

## Stand for a box of gloves or handkerchiefs

**MH22.5**

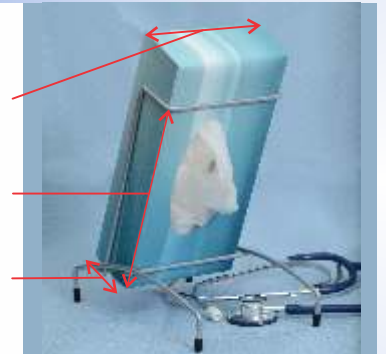

**MH22.5**

Maximum width  
4 3/4" / 12,7 cm  
No minimum width

Minimum height  
8" / 20,32 cm

Minimum depth  
2" / 5,08 cm

Incline 22,5 %

When the box is half-empty, the gloves or tissues tend to fall to the bottom.  
It's then necessary to reach inside to get a new one and in doing so, it becomes hard to take one out at a time.

Touching several gloves or tissues at once or putting them back in the box can contribute to spreading germs and is thus unhygienic.

Our MH22.5 stand for a box of gloves or tissues is ideal for avoiding this type of problem.  
The box sits on an inclined base, keeping the gloves or tissues resting against the front surface of the container so that they won't fall to the bottom.

The gloves or tissues are more accessible and can easily be pulled out, one by one, while remaining dust-free.

SHELFs

All our dispensers can be custom made according to the specifications of your supplies.

**Greetings,**

**At Médic Accès, we manufacture high quality hospital PPE organizers and dispensers that are crafted and recognized for their durability.**

**Our reputation provides the assurance that our mobile and wall-dispensing ISO units will remain dependable, state-of-the-art systems for years to come.**

**Quest for excellence**

**Your comments and suggestions are most welcome if ever our manufactured products fail to provide complete satisfaction to the end-users.**

**At Médic Accès, we do our utmost to design products that meet our customers' requests and specifications. Our mission consists of manufacturing superior quality products that respond to your needs at all times!**

**We owe our success to the innovative and visionary spirit that guides us and to the, special attention we give to crafting market-driven products in response to changing customer needs.**

**For the last eight years, you and I have been collaborating and I would like to take this opportunity to thank you sincerely for your ideas, help and trust which have certainly contributed to the success of Médic Accès our continuing development and success.**

**Thanks to you all and I look forward to meeting with you again.**

**Denis Sirois  
President**
