STABILITY**

Médic Accès

Mobile Hygiene and Communication Station

INCLUDING
TWO STOPS*

Messages
and dispenser
on both sides.

**B MODEL
STATION**

Bidirectional Mobile Hygiene Station
for the distribution of products and the procedure to follow.

Complete stability and security.

The mobile station was conceived for maximum stability and safety. Antiseptic gel is obtained by depressing the lever of a pump dispenser; existing dispensers vary greatly among manufacturers. Regardless of the amount of pressure required to activate the gel dispensers, station stability is achieved at all times due largely through the station's steel footing (35.4 kg / 78 lb) that ensures inertia.

The steel footing resides on top of four non-slip polymer pads which, combined to the base inertia, provide anti-skid properties even on very smooth floor surfaces.

Moreover, the vertical steel post has continuous weld at an angle to provide the station with optimal stability when dispensers are activated.

Mobility

The entire assembly becomes mobile and may be easily moved around by maintenance personnel or in emergency by simply tilting the station on its side where 2 cart wheels are attached.

Robust and durable

The carbon steel vertical post is extremely robust and presents properties that softer aluminum can never match.

In our experience, using auto tapping screws will provide a long lasting and secure contact between the steel and most gel dispensers available on the market.

All steel surfaces coated with white electrostatic powder without solvent and cured by thermal baking to provide exterior-grade resistance.

We are convinced that the mobile hand hygiene station is a high quality apparatus which will provide complete satisfaction in PPE dispensing as well as timely information for procedures in infection control for many years ahead.

Hand hygiene station
Carbon steel column 12 gauge
- Height : 6'. (1,83 m)

- Dimension : 3 x 1.5" (7,6 x 3,2 cm) welded to station footing

Stable footing

- 1 in. carbon steel base plate with rounded corners ;
- Dimension 16 x 16 x 1" ; 78 lb (40,6 x 40,6 x 2,54 cm ; 35 kg)
- 4 anti-skidding, scratch proof rubber feet (dia. 1" / 5,1 cm) ;
- Rubber wheels (2) welded to one side for easy maneuvering

All steel surfaces coated with electrostatic application of thermoplastic powder
High temperature thermal baking
Glass-like, glossy white finish resistant to corrosion and impacts
Including fitting of your own gel dispensers

*With the purchase of a B model station

Hygiene and Communication Station

H MODEL STATION

INCLUDING
TWO STOPS*

**Messages
and dispenser
on both sides.**

Lightweight and stability

The H model station was designed to be used for an alcohol solution dispenser with sensor electronic movement or bottle vertical pump.

The station model H was conceived for maximum stability and safety. .

The steel footing resides on top of four non-slip polymer pads which, provide anti-skid properties even on very smooth floor surfaces.

Robust and durable

The carbon steel vertical post is extremely robust and presents properties that softer aluminum can never match.

In our experience, using auto tapping screws will provide a long lasting and secure contact between the steel and most electronic or pump gel dispensers available on the market.

All steel surfaces coated with white electrostatic powder without solvent and cured by thermal baking to provide exterior-grade resistance.

We are convinced that the hand hygiene station model H is a high quality apparatus which will provide complete satisfaction in PPE dispensing as well as timely information for procedures in infection control for many years ahead.

Hand hygiene station
Carbon steel column 12 gauge
- Height : 5'. (1,83 m)

- Dimension : 3 x 1.5" (7,6 x 3,2 cm) welded to station footing

Base 14 x 14"

- Three steel tubes with four corners in black plastic :

Tubing 3 x 1.5" ; 19 lb (35,56 x 35,56 x 2,54 cm ; 8,6kg)

-4 anti-skidding, scratch proof rubber feet (dia. 1" / 5,1 cm)

dimension 1 x 1 x 1/2" (5,08 x 5,08 x 1,27 cm)

All steel surfaces coated with electrostatic application of thermoplastic powder

High temperature thermal baking

Glass-like, glossy white finish resistant to corrosion and impacts

Including fitting of your own gel dispensers

*With the purchase of a H model station

Easily interchangeable octagonal magnetic displays Ideal for message sectored instructions.

Move the station to the entrance of a risk area.

Interchangeable Incoming and Outgoing messages with relevant messages about conditions in the area.

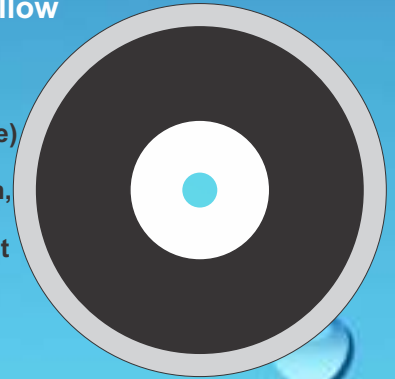

All users will thereby be given the instructions to follow before entering and leaving the area

Please note that our print shop will never produce a sign before receiving from you approval of a final proof. Once a final proof is approved, the signatory is responsible for the accuracy of the texts and the choice of images already selected. Many proofs are often required to obtain a final result. Proofs will be emailed to you.

Graphics applications on the floor are a great communication solution at the entrance to a restricted area.

Médic Accès

Greetings,

At Médic Accès, we manufacture high quality hospital PPE organizers and dispensers that are crafted and recognized for their durability.

Our reputation provides the assurance that our mobile and wall-dispensing ISO units will remain dependable, state-of-the-art systems for years to come.

Quest for excellence

Your comments and suggestions are most welcome if ever our manufactured products fail to provide complete satisfaction to the end-users.

At Médic Accès, we do our utmost to design products that meet our customers' requests and specifications. Our mission consists of manufacturing superior quality products that respond to your needs at all times!

We owe our success to the innovative and visionary spirit that guides us and to the, special attention we give to crafting market-driven products in response to changing customer needs.

For the last eight years, you and I have been collaborating and I would like to take this opportunity to thank you sincerely for your ideas, help and trust which have certainly contributed to the success of Médic Accès our continuing development and success.

Thanks to you all and I look forward to meeting with you again.
